Maximum Annualized Spread	9.50% (19.00% for the entire 2-year term)	9.50% (19.00% for the entire 2-year term)

For the Annual Point-to-Point Index Interest Account (S&P 500), the Index Rate Cap is the maximum rate of interest you can earn in one year. For the Annual Point-to-Point Index Interest Account (ML Strategic Balanced), the Spread is the percentage that reduces the rate of Index Interest that may be credited for that contract year. For the 2-Year Point-to-Point Index Interest Account (ML Strategic Balanced and PIMCO Global Optima Index), the Annualized Spread multiplied by two is the percentage that reduces the rate of Index Interest that may be credited for the 2-year period. The Index Rate Caps and Spreads are set at contract issue and guaranteed for one index term, after which they are subject to change at the end of each index term. Please see the Owner Acknowledgment and Disclosure Statement for more information.

\* The actual equity exposure may fluctuate. For more information about the Target Equity Exposure of each index, please refer to the Power 7 Protector or Power 7 Protector Plus Income Brochure (I5410CN2 or I5411CN2).

## Fixed Interest Account

	No Living Benefit Rider	With Lifetime Income Plus®
<b>1-Year Fixed Interest Account</b>		
Initial Interest Rate (Premiums of \$100,000 or more)	2.00%	1.40%
Initial Interest Rate (Premiums under \$100,000) <sup>1</sup>	2.00%	1.40%
Minimum Declared Interest Rate	1.00%	1.00%

The initial interest rate is guaranteed for one year from the date the contract is issued. On each contract anniversary, the company will declare the interest rate that will apply for the next contract year. The interest rate may change on an annual basis, but will never be less than the guaranteed minimum declared interest rate for the life of the contract.

<sup>1</sup> An initial premium below \$100,000 receives the lower initial index rate cap, interest rate or higher spread. If multiple premiums are received during the modified single premium period, causing the total premiums received to reach \$100,000 or more, the higher initial index rate cap or lower spread would apply to all premiums. In Oregon, Power 7 Protector Plus Income can only be issued as a single premium product. No other premiums may be paid.

**Rate Lock Policy:** Your contract provides for a rate lock for index interest account rate caps, spreads (if applicable), participation rate (if applicable), and the fixed account interest rate. You will receive the better of 1) rates effective as of the date you sign your application for this annuity contract or 2) the rates effective as of the date your contract is issued, provided all premiums are received by the 60th day following the date your application for this annuity contract is signed.

**Transition rules may apply when rates change. Rate lock policy will only apply to paperwork received in good order by the specified transition period end date. All other contracts will be issued with effective rates as of the contract issue date.**

Until a contract is issued, American General Life Insurance Company (AGL) reserves the right to close out an application file and return all funds received to date. If AGL elects to close out a file, the application is considered void and ineligible for a rate lock.

<sup>1</sup> You may select an optional return-of-premium guarantee at the time of purchase. If you select the return-of-premium guarantee, the annuity may be returned at any time for an amount equal to the single premium paid, less prior withdrawals, or the cash surrender value (annuity value less any applicable early withdrawal charges), whichever value is greater. Adding this feature will result in a slightly lower initial interest rate than a contract without the feature would receive.

<sup>2</sup> This is an annual effective rate. Interest is credited to the contract daily (based on a 365-day year) to achieve an annual yield that's equal to the declared rate. The money must remain in the annuity (without any withdrawals) for the entire year to achieve the rate. When the initial interest rate guarantee term expires, future interest rates will be declared annually, based on current market conditions. Current rates are subject to change at any time. Withdrawals above the free amount are subject to a declining withdrawal charge schedule for either a five-year period (9%, 8%, 7%, 6%, 5%, 0%) or a seven-year period (9%, 8%, 7%, 6%, 5%, 4%, 2%, 0%) from the contract date, depending on product selection. Withdrawals taken prior to age 59½ are generally subject to a 10% federal early withdrawal tax penalty in addition to ordinary income tax.

<sup>3</sup> A market value adjustment (MVA) may apply to withdrawals before the end of the MVA term. The adjustment can either increase or decrease the withdrawal amount depending on the current interest rate environment at the time it is incurred. MVA does not apply to withdrawals representing free withdrawal amounts, RMDs or death benefit.

Guaranteed minimum interest rate is 0.25%<sup>2</sup>

<sup>2</sup> This is an annual effective rate. Interest is credited to the contract daily (based on a 365-day year) to achieve an annual yield that's equal to the declared rate. The money must remain in the annuity (without any withdrawals) for the entire year to achieve the full rate. When the initial interest rate guarantee period expires, future interest rates will be declared annually, based on current market conditions. Current rates are subject to change at any time before the contract is issued. Withdrawals above the penalty-free amount are subject to a declining withdrawal charge schedule for a five-year period (9%, 8%, 7%, 6%, 5%, 0%) or for a seven-year period (9%, 8%, 7%, 6%, 5%, 4%, 2%, 0%) from the contract date depending on the product selected. Withdrawals taken prior to age 59½ are generally subject to a 10% federal early withdrawal tax penalty in addition to ordinary income tax.

<sup>3</sup> Interest rate enhancement is payable for the full three-year guarantee term.

Annuities are long-term retirement saving vehicles.

Retirement plans and accounts such as 403(b)s, IRAs, 401(k)s, etc., can be tax deferred regardless of whether or not they are funded with an annuity. Investment in an annuity within a plan does not provide additional tax-deferred treatment of earnings. However, annuities do provide other features and benefits.

Withdrawals above the penalty-free amount are subject to a declining withdrawal charge schedule for 10 years (8%, 8%, 8%, 7%, 6%, 5%, 4%, 3%, 2%, 1%) and a market value adjustment during the guaranteed rate term. Withdrawal charges are applied as a percentage of the amount withdrawn, before application of the MVA, if any, in excess of the free withdrawals and decline over 10 years from issue date. No withdrawal charge or market value adjustment will be imposed on a full or partial withdrawal made within the 30-day period following the end of the guaranteed rate term. After the 30-day window expires, withdrawal charges will resume for any withdrawal in excess of free amounts through the 10th year. Withdrawals may be subject to federal and/or state income taxes. A 10% federal early withdrawal tax penalty may apply if taken before age 59½. Partial withdrawals may reduce benefits and contract value.

<sup>3</sup> During the withdrawal charge period, the guaranteed minimum interest rate is as shown above. After the withdrawal charge period ends, the guaranteed minimum interest rate will be 0.25% for the remainder of the contract.
