The Momentum Asset Allocator 5.5% Volatility Control Index is calculated on an excess return basis reflecting the weighted performance of the Index constituents in excess of the performance of the Deutsche Bank Momentum Money Market Index. In addition, the Index also reflects the daily deduction of a 0.25% per annum fee.

While volatility controls may result in less fluctuation in rates of return as compared to indices without volatility controls, they may also reduce the overall rate of return as compared to products not subject to volatility controls.
